The Village of Indian Head Park will be performing asphalt rejuvenating maintenance on your streets. Please be advised that the contractor CAM, LLC is scheduled to do work on your street starting Thursday, November 10th. Consequently, there will be

No On-Street Parking on Thursday November 10th

Between the hours of 8 am until 4:30 pm.

(Please be aware that this treatment is weather dependent, if the forecast calls for rain, operations will be delayed.)

If you have a lawn sprinkling system that sprays onto the street pavement you should turn it off for the day the work will be performed on your street and one day following the treatment. Water can reduce the effectiveness of the rejuvenator.

Treatment FAQ:

Why is the Village applying product to my road?

CAM, LLC will be applying CRF Restorative Seal to your roads. CRF is a product designed to extend the life of the pavement by sealing the pavement from the elements. The Village's preventative maintenance effort will minimize the need for more costly and disruptive methods of street repair.

How long does the process take?

Once the contractor begins on your street, the process will only take a few hours. Once the road has been sanded the road will be fully opened to traffic.

When can I drive on the road?

You can exit your driveway and drive through the work area, but please go slow and stay on the sanded area. Be advised that driving onto a driveway before the contractor is finished sanding may cause the driveway and sidewalk to become stained.

If I get product on my vehicle how do I remove it?

Using soap and water immediately will remove any product. If it remains on the vehicle longer, WD-40 or a bug and tar remover will safely remove it.

When will the road be cleaned up?

After the product is applied, an application of limestone screenings will be applied to the road. This is not permanent. The screenings will be swept up a few days after the product is applied.

These agents are environmentally safe and will extend the pavement's life. Please work with us through any inconveniences during the application process.

Thank you for your patience
CAM, LLC
